

## Quiz

1  Which of the following are methods for indexing into a DataFrame?

- ☐ A) Use the `loc` and `iloc` functions
- ☐ B) Directly index columns similar to a Python dictionary
- ☐ C) Using slices to retrieve a set of rows

Your Answer

 D) All of the above

2  What is the difference between a Series and a DataFrame?

Your Answer

 A) A Series is 1-D while a DataFrame is 2-D

- ☐ B) The DataFrame is the replacement of the deprecated Series
- ☐ C) A DataFrame is faster but has less functionality

☐ D) They are both aliases for the same object

3 ☒

What is a categorical feature?

Your Answer

☒

A) A data feature that can be placed into one of several different categories

☐

B) A list-like data feature that has many different categories of sub-data

☐

C) A data feature that categorizes other data features

☐

D) A data feature that is the accumulation of many other data features

4 ☒

What is an indicator feature?

☐

A) A feature that indicates whether or not the data has been pre-processed

Your Answer

☒

B) A feature that represents categorical data, using 1's and 0's to denote which categories are present

- ☐ C) An indicator of whether or not a category is quantitative or categorical

- ☐ D) None of the above

#### SUMMARY
