Quiz

1 ✓ What is the main benefit of Keras over TensorFlow?

○ **A)** It is better for writing industry-level production code

○ **B)** It provides more model architectures to use for different applications

> Your Answer

✓ **C)** The API is simpler to use, especially for model training and evaluation

○ **D)** There is no benefit, since Keras is built on top of TensorFlow

2 ✓ What does the `Dense` object represent in Keras?

○ **A)** A neuron in a neural network

○ **B)** A weighted connection between two neurons

● **C)** A multilayer perceptron

✓ **D)** A fully-connected neural network layer

3 ✓ For multiclass classification, what is the output of the `predict` function of a Keras `Sequential` model?

✓ **A)** A 2-D NumPy array of class probabilities

○ **B)** A 1-D NumPy array of class predictions

○ **C)** A dictionary of class predictions
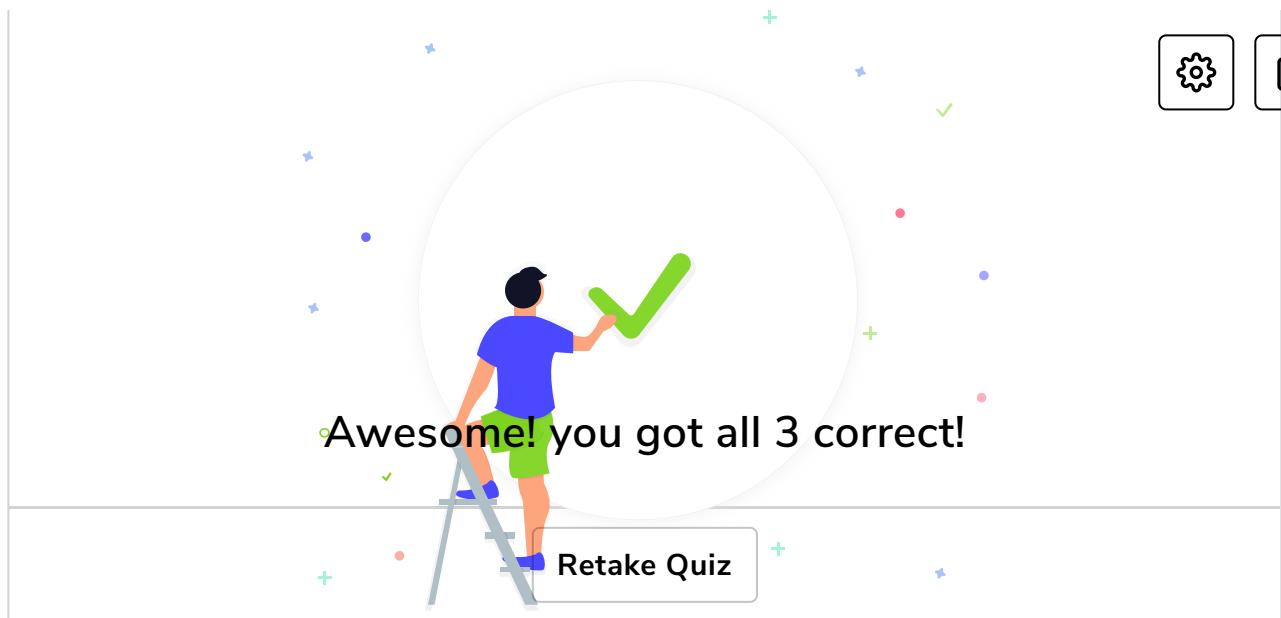

○ **D)** A 2-D NumPy array of logits

SUMMARY

Correct	3

Incorrect	0

Awesome! you got all 3 correct!
